Job Description

The Role

Hi there! We're looking for an empathetic teammate with strong written & oral communication, as well as experience creating engaging, in-depth, technical content to join our team.

--- The Company & Product ---

Mosaic Manufacturing Ltd. is working with the world's top companies to re-envision and modernize their polymer supply chains. The past five years have seen more supply chain disruptions than ever before and companies are recognizing that they need to take steps to make their supply chains more resilient.

With our digital, distributed Array micro-factories we are perfectly positioned to take advantage of the trend of companies re-envisioning supply chains to make them more resilient, flexible and efficient. We have beaten out companies who have 10x Mosaic's team and funding to become the production system of choice for a number of firms. We are looking for a driven finance leader to work with us as we grow our install base from 20 to 2,000+ production systems in the market.

Want to get an idea of what is inside Mosaic's Array production system?

--- The Role ---

We are looking for a skilled Technical Content Creator to join our growing marketing team. As a Technical Content Creator, you will play a crucial role in producing high-quality, informative content that educates and engages our audience. Your expertise in technology and communication skills will help us deliver compelling content that resonates with professionals in the additive manufacturing and broader manufacturing market.

Key Responsibilities:

- Research, write, edit, and proofread technical content such as blog posts, articles, whitepapers, case studies, and product documentation.
- Translate complex technical concepts into clear, concise, and engaging content for a diverse audience.
- Collaborate closely with subject matter experts, marketing team members, and other stakeholders to develop content strategies that align with marketing goals.
- Ensure all content is accurate, well-researched, and meets company standards for quality and style.
- Optimize content for SEO to increase organic search visibility and drive traffic to our digital platforms.
- Stay up-to-date with industry trends, technologies, and best practices to continuously improve content quality and effectiveness.

Requirements:

- Proven experience as a Technical Writer, Content Creator, or similar role with a strong portfolio of published work.
- Excellent writing, editing, and proofreading skills with a meticulous attention to detail.
- Ability to explain complex technical information clearly and concisely.
- Familiarity with SEO principles and best practices.
- Proficiency in Google Workspace and content management systems (CMS).
- Bachelor's degree in English, Journalism, Communications, Engineering, Computer Science, or a related field is preferred.

Preferred Qualifications:

- Experience in the 3D printing, manufacturing, or technology sectors.
- Knowledge of graphic design, multimedia production, or video editing is a plus.
- Understanding of HTML, CSS, and web development concepts.

Join us at Mosaic Manufacturing and contribute to the future of the additive manufacturing industry.
