Job Description

Tenstorrent is leading the industry on cutting-edge AI technology, revolutionizing performance expectations, ease of use, and cost efficiency. With AI redefining the computing paradigm, solutions must evolve to unify innovations in software models, compilers, platforms, networking, and semiconductors. Our diverse team of technologists have developed a high performance RISC-V CPU from scratch, and share a passion for AI and a deep desire to build the best AI platform possible. We value collaboration, curiosity, and a commitment to solving hard problems. We are growing our team and looking for contributors of all seniorities.

We are growing here at Tenstorrent and are seeking to add a *Toronto-based* Contract Technical Recruiter to join our dynamic Talent Acquisition team. Tenstorrent is perfectly positioned within the booming AI Hardware landscape and we are looking for a talented recruiter to help us find and hire the best talent to join the company. If you're excited about AI Hardware, like recruiting for highly specialized positions and partnering with brilliant engineering minds, then this role could be perfect for you.

This is a 6 month contract role with the potential for extension.

This role is hybrid, based out of Toronto, Ontario, Canada (this is not a remote opportunity)

Responsibilities:

• Partner with Tenstorrent leaders and hiring managers to craft hiring roadmaps and strategies to attract top-notch engineering and non-engineering talent for our rapidly growing teams.

• Dive deep into the requirements of various roles and come up with innovative sourcing strategies to find the industry's top talent.

• Partner with the wider recruiting team to grow the Toronto office.

Experience and Qualifications:

• At least 3 years of experience of recruiting experience. It is ideal that you have expertise in recruiting within one or more of the following fields: AI, ML, Software Engineering, Hardware Design, CPU Architecture, Systems Engineering.

• Experience with sourcing/closing niche candidates within a highly competitive market.

• Ability to create and drive dynamic and adaptive sourcing strategies.

Tenstorrent is an equal opportunity employer.

Due to U.S. Export Control laws and regulations, Tenstorrent is required to ensure compliance with licensing regulations when transferring technology to nationals of certain countries that have licensing conditions set by the U.S. government.

As this position will have direct and/or indirect access to information, systems, or technologies that are subject to U.S. Export Control laws and regulations, please note that citizenship/permanent residency, asylee and refugee information and supporting documentation will be required and considered as a condition of employment.

If a U.S. export license is required, employment will not begin until a license with acceptable conditions is granted by the U.S. government. If a U.S. export license with acceptable conditions is not granted by the U.S. government, then the offer of employment will be rescinded.
