Job Description

About BinSentry:
BinSentry is an extremely fast-growing ag-tech company started here in KW. BinSentry is focused on providing solutions for the agriculture supply chain that help increase efficiency, reduce costs, and enhance profitability. As a leader in the use of artificial intelligence, BinSentry offers technology solutions that pair best-in-class optical sensors with user-friendly software to provide our customers with enhanced forecasting and decision-making capabilities.

With our technology, feed mills and protein producers are enhancing feed ordering efficiency, raising healthier animals, improving employee safety, reducing their environmental footprint and - most significantly - uncovering new savings. Today, BinSentry is monitoring more than 20,000 bins in real time across North America. When it comes to the future of agricultural supply chain management, BinSentry is leading the way. For more information visit www.binsentry.com.

As we scale up, we're looking for a **Junior Software Developer** to help us build the software that is changing the face of the feed industry.

Job Summary:
Join our team of 10 developers to build new software features in our software platform! We're looking for smart, generalist developers who can work to take feedback from our product team and improve our product. We are a small, fun team that moves fast without a lot of red tape. You'll work across both our backend and UI, creating intuitive interfaces and building the underlying systems that keep everything running seamlessly.

Qualifications:
• **Bachelor's degree** in Computer Science, Software Engineering, or related field (or equivalent experience)
• Proficiency in **JavaScript** (we use React, Node.js)
• Proficiency in **AWS** (DynamoDB, Lambda, SQS, Serverless) is a plus
• Computer vision and ML experience is a plus
• We are looking for smart, capable developers who can learn what they need quickly to succeed
• Ability to think about long-term maintenance when creating or making changes
• Product mentality: figure out how to maximize value and deliver that to the customer.
• Highly detail-oriented and completeness-driven; won't stop until it's done properly.
• Ability to prioritize tasks, set realistic estimations, and manage time effectively.
• Problem solver, proactive, go-getter and professional team player

Benefits:
• Company-paid group health and dental benefits plus your choice of an annual HSA or PSA
• Competitive compensation and an equity package
• Awesome company events
• Be a part of a team of talented and friendly senior-level developers.
