Job Description

Who we are and what we do

Mappedin is a global leader in indoor mapping and spatial data management. Our solutions power billions of square feet of indoor space and guide millions of people visiting malls, stadiums, airports, offices, healthcare facilities, warehouses, universities, and more. We're making maps as powerful indoors as they are outdoors. With custom enterprise solutions, easy-to-use developer tools, and a revolutionary self-service mapmaking platform, we enable our customers to enhance indoor experiences, optimize spaces, track assets, and ensure public safety with AI-powered mapping technology. For more information about Mappedin, visit mappedin.com. To try out our mapping tools, visit <https://app.mappedin.com/editor/>

Who you are and what you'll do

You are a designer who is highly autonomous and enjoys owning projects from inception to completion. You have strong analytical and problem-solving skills and strong visual design in the digital space. You are proficient with Figma and bring in efficient UI, IxD and visual design skills and processes.

As a part of the engineering team and reporting to the VP of Engineering, you are responsible for the following:

- Designing and creating visually appealing, intuitive and functional user interfaces for our products.
- Collaborate with the development teams to understand user requirements and design effective user interfaces that meet their needs.
- Create prototypes, and high-fidelity visual designs using industry standard design tools such as Sketch and Figma.
- Design intuitive and user-friendly interfaces that are consistent with our brand guidelines and design standards.
- Work closely with developers to ensure designs are implemented accurately and according to design specifications.
- Keep up-to-date with industry trends, best practices, and emerging technologies in UI design.

What are we looking for?

- 2+ years of experience as a UI Designer or similar role
- Proven experience as a UI Designer, with a portfolio showcasing your work and demonstrating conceptual, design and process thinking skills
- Proficiency in design tools, specifically Figma
- Strong visual design skills, including color theory, typography, and layout.
- Excellent communication skills and ability to collaborate effectively with cross-functional teams.
- Strong attention to detail and ability to work in a fast-paced environment.

Nice to have

- Experience working with 3D design and 3D modeling
- Experience with 3D tools such as Blender, SketchUp, Spline, Cinema 4D etc.

What are some challenges?

We move fast and sometimes change directions. We can't always wait for all the information before we try something. If you want us to guarantee exactly what you'll be working on three months from now, we can't give you that. On the other hand, there is a lot of high value work to do, and it won't be boring. There is a lot of discovery work involved as we frequently do things that are ahead of current technology.

One of our values is playing for the team so you may need to sometimes put aside personal objectives in order to help meet more urgent company objectives, but others will do the same for you.

Behind the scenes

There's a lot of trust here. We are a REMOTE company, but this role may require you to come into the office from time to time. If you're local, there will probably be a few days a week when you can expect other people to be in the office, but this role could also be fully remote. We work flexible hours, have a flexible vacation policy and work to provide the hardware or office equipment you require to unleash your potential. We will do what it takes to get things done if we said we would do it. We stay curious, challenge opinions, take risks, and learn from mistakes. We're competitive and we like to win together. We want you to join us.

We welcome applications from people with disabilities. We provide reasonable accommodations for candidates upon request through the recruitment process. For additional information, please email us at accessibility@mappedin.com or call us at (519) 594-0102 and ask to speak to a member of the Human Resources team.
