Job Description

At Interac, we design and deliver products and solutions that give Canadians control over their money so they can get more out of life. But that's not all. Whether we're leading real-time money movement, driving innovative commerce solutions like open payments for transit systems, or making advancements in new areas like verification and open banking, we are playing a key role in shaping the future of the digital economy in Canada.

Want to make a lasting impact amongst a community of creative thinkers, problem solvers, technical gurus and high-performance application developers? We want to hear from you.

Reporting to the Product Management Leader, the Product Manager will be responsible for the development, delivery, and management of Interac Verified. Interac Verified™ offers a suite of secure verification and authentication solutions that enables Canadians to have convenient digital access to participating government and business services that require personal data verification. Leveraging decades of experience in delivering secure payments, Interac Verified enables businesses to digitally verify potential customer and client data to deliver faster, more efficient, and convenient access to online services.

You'll be responsible for:

- Serve as Subject Matter Expert (SME) for governance, and compliance across all Verified products
- Lead incident triage, determine appropriate actions, and collaborate with squad to enhance processes and security protocols
- Provide thought leadership and expertise in product management capacity during internal and external meetings
- Contribute to network health strategy development, actively participate in roadmap creation and execution
- Act as cross-squad liaison to ensure process consistency and awareness of new product developments impacting ecosystem safety and soundness
- Maintain strong relationships with Product Owners/Managers, Business Development, Legal, and Participant Affairs to deliver Network Health objectives
- Support sales cycle with fraud and governance expertise for Verified products
- Conduct market research, identify industry trends, and analyze competitive landscape in partnership with the strategy team
- Prioritize product roadmap decisions using data-driven insights and multiple data points
- Navigate ambiguity and manage stakeholders to drive product commercial success
- Develop and present materials supporting senior management in articulating findings and recommendations to key stakeholders

You bring:

- 5+ years of experience as a Product Manager, focusing on governance, and compliance in financial services or regulated industries
- Experience developing and executing product strategies in an agile environment
- Strong understanding of network health strategies and ecosystem safety in digital products
- Exceptional stakeholder management and relationship-building skills
- Proficiency in market research, competitive analysis, and data-driven decision making
- Advanced problem-solving skills and ability to navigate complex situations
- Excellent presentation and communication skills
- Experience in cross-functional team leadership
- Bachelor's degree in business, Computer Science, or related field; MBA or relevant advanced degree preferred
- Passion for technology and adaptability to new tools and platforms
- Must be eligible to work for Interac Corp. in Canada in a Full Time Capacity

Interac requires employees to complete a background check that is completed by one of our service providers. We use this service to complete the following checks:

- 5-year employment verification;
- Canadian criminal record check;
- Education verification;
- Canadian ID cross-check;
- Public safety verification; and
- Credit inquiry
