Job Description

At [Prenuvo](#), we are on a mission to flip the paradigm from reactive “sick-care” to proactive health care. Our award-winning whole body scan is fast (under 1 hour), safe (MRI has no ionizing radiation), and non-invasive (no contrast). Our unique integrated stack of optimized hardware, software, and increasingly AI, coupled with the patient-centric experience of our clinics across North America, have allowed us to lead the charge against “we caught it too late again.” Prenuvo operates preventative screening clinics in Vancouver, Silicon Valley, Dallas, Houston, Boca Raton, Minneapolis, Los Angeles, New York City, Buffalo, Bethesda, Chicago, and Atlanta, with more clinics in North America and internationally in the next 2 years.

We are in search of a **Product Manager** to help make this a reality by enhancing the efficiency and reliability of our radiologists so that we can serve more members and provide them better insights to improve their health. Reporting to the Group Product Manager, this person will work closely with radiologists to understand their current workflows and identify ways to give them superpowers. This will include continuous improvement of our existing radiology software, building entirely new products and services, and intelligently implementing AI insights in their workflow.

This person will build empathy for Prenuvo members and translate medical findings and recommendations into plain language that is easily understandable by members while retaining the precise medical accuracy intended by radiologists. This includes the constant evolution of our fundamental software used to capture clinical findings and to generate guidance to Prenuvo members.

The successful candidate will work with cross-functional teams including Engineering, Product Design, Radiology, Clinical Operations, and others to ensure we define problems worth solving and devise solutions that work for our members, our radiologists, and our business. In doing so, you will directly shape the future of preventative healthcare. This role will be a **hybrid-role based in our Toronto Headquarters located at 5200 Yonge Street, Toronto, ON.**

What You'll Do

- Build a deep understanding of the needs and workflows of radiologists and identify opportunities to make our radiologists more efficient and reliable
- Develop empathy for Prenuvo members and uplevel the insights we provide them
- Understand business strategy and context to inform prioritization
- Own the product delivery plan for multiple products within the radiology POD
- Measure success against outcomes and goals set by the product and business strategy (OKRs, KPIs)
- Set the direction for sprints in collaboration with engineering and design teams, prioritizing problems, crafting user stories and managing backlogs to maximize product value
- Collaborate with Engineering, Product Design, Radiology, Clinical Operations, and others to ensure successful product delivery
- Assess user feedback and product usage data to generate insights for how to improve our products and services
- Maintain strong relationships with stakeholders and balance their requests with the other priorities you have defined

What You'll Bring

- Bachelor's degree in a technical field (e.g. Computer Science) is beneficial, but not required. We value relevant expertise from past experiences if you come from a non-technical education background.
- 4 years of experience as a Product Manager using Agile methodologies, preferably with a minimum of 2 years in healthcare technology
- Experience working closely with healthcare professionals, while understanding their clinical workflows, healthcare processes, and the challenges they face
- Composure to productively work with a wide variety of personality types
- Familiar with EMR, EHR, RIS and Imaging (DICOM), PACS
- Respect for patient privacy and confidentiality, and experience with HIPAA
- Experience working with Engineering Leads to devise solutions that are technically feasible
- Experience working with Product Designers to ensure an excellent user experience and intuitive software
- Experience with applications of AI in healthcare
- Strong organizational and prioritization skills, managing product delivery plans and sprint coordination
- Proficient in Jira and Confluence, and experience working with design and collaboration tools (e.g. Figma.)
- Willingness to get into the details—whether its scoping a new task in Jira or understanding new issues being faced by radiologists
- Excellent written and verbal communication skills with the ability to influence others
- Habits of continuous learning
- Ability to thrive in a fast-paced, dynamic environment and manage multiple projects simultaneously. We're a startup, so you will get variety
- Dissatisfaction with the current state of healthcare, and a strong drive to make healthcare more preventative and proactive using cutting-edge technology
- You're passionate about the Prenuvo mission

Our Values

First: we are **Pioneers**

Transforming healthcare requires divergent thinking, bias for action, disciplined experimentation, and consistent grit and determination to maintain momentum. This journey is as challenging as it is rewarding.

Second: we are **Platform-Builders**

We're always building foundations that allow us to achieve tomorrow more than we did today. We never lose sight of what's ahead – in a mindset of ownership and duty to our mission.

Above all: we are **Patients**

We could all be the next person who walks through our very doors, seeking clarity or peace of mind. We are proud of our impact on our patients' lives, and we won't stop till everyone can benefit from our work.

What We Offer

- An avenue to make a positive impact on people's lives and their health
- We believe in preventative healthcare for everyone, including our team - Prenuvo provides free, whole-body scans to each team member
- Growth opportunities are at the heart of our people journey, we're doing big things with bright minds - there is no single path to success, it can be shaped along the way
- Building strong relationships is at the core of everything we do - our team gets together each week to connect, share, and socialize
- Daily health at Prenuvo means having space to take a break and refuel - at our office locations, we keep our break room stocked with good coffee and healthy snacks
- Recognizing time away to restore is vital to our wellbeing - we have a flexible vacation policy and we will encourage you to use it
- We offer a comprehensive benefits package including health, dental, vision, including Mental Health coverage, and an Employee and Family Assistance Program to support you and your family
- **The base salary offered for this position ranges from \$100,000 - 130,000 in local currency commensurate with experience**

We are an equal-opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.

As part of the hiring process, successful candidates will undergo a background check in compliance to applicable federal, provincial, and state rules.

Please be advised that official communication from our recruitment team will only come from our authorized domain [prenuvo.com](#). If you are contacted by a recruiter, please ensure their email address ends with @prenuvo.com. We do not use third-party recruitment services or any other email domains for hiring purposes. If you receive communication that you believe to be fraudulent, please report it immediately to jobs@prenuvo.com.
