Job Description

Say hello to Newton! The innovative platform that redefines cryptocurrency trading for Canadians. We are on a mission to make financial freedom an accessible reality to every Canadian. We want to empower our customers with the tools and knowledge they need to successfully navigate the world of Crypto.
Picture yourself collaborating with a team spread across Canada, yet seamlessly operating in a fully remote capacity. At Newton, distance is not a barrier: it's an opportunity for collaboration and innovation to thrive. Are you ready to be a part of something bigger? Join a team of driven individuals dedicated to pushing the limits of what's possible.

Some of our values:

 Customer first mindset - Commitment to integrity and transparency to our users!

 A dynamic team fueled by collaboration uniting our strengths to overcome any obstacles. Together we build success. We persevere, adapt, and come back stronger, turning obstacles into opportunities.

 We strive for continuous improvement and embrace creativity and encourage experimentation. We push the boundaries of what's possible and continuously explore new ideas, technologies, and solutions.

Role Overview:

We are searching for a Product Manager, a role focused on working closely with development teams, gathering product requirements, prioritizing feature implementation, conducting user research, and envisioning the end state customer experience. Your mission: leading priorities from end-to-end. You will drive the successful execution of new features and shape the product through iterations of development cycles, user research, user acceptance, and live releases to production.

Responsibilities will include:

 Strong execution skills, owning the problem space and solving ambiguous problems that support the product strategy

 Own outcomes that address ambiguous problems and customer needs with accountability for both execution and direction of projects

 Define, build, market, and launch product solutions by synthesizing high level insights from research, market gaps, or cutting-edge technical insights to independently build a compelling narrative, vision, and roadmap in support of the group strategy or direction

 Build consensus with senior leaders and influence cross-functional groups and are the subject-matter specialist for your domain with an established mastery and deep understanding of users, markets, competitive landscape, user insights and technologies

 Envision and communicate the end state customer experience to guide the product's development

 Ensure product metrics are at the center of our decision making process to identify areas for improvement

 Own quality assurance for and controls on the user experience product ensuring a consistent world class experience

Who you are:

 You have proven experience as a Product Manager

 Startup experience or a strong passion for working in a startup environment

 Demonstrated passion for user experience, digital design, and technology

 Experience working with Jira/Notion or similar project management software

 Strong execution skills with the ability to start and finish projects end-to-end

 Excellent communication and interpersonal skills

Bonus:

 Experience working with a SaaS platform

 Experience working in Crypto or financial services

 Experience with web development or cloud platforms

At Newton, we celebrate our inclusive work environment and welcome members of all backgrounds and perspectives to apply. We are committed to providing reasonable accommodations and will work with you to meet your needs. If you are a person with a disability and require assistance during the application process, please don't hesitate to reach out!
