Job Description

As one of Canada's largest and fastest growing cryptocurrency trading platforms, NDAX has set the bar high for the country's fintech industry and is constantly leading the way in terms of security and innovation. We're on a mission to empower more Canadians to unlock the full potential of digital finance. To address the various needs in the Canadian cryptocurrency space, NDAX has assembled a multidisciplinary team with diverse backgrounds, including finance, technology, engineering, compliance, marketing, and more. **We're proud to have been recognized as one of Canada's Best Workplaces by Great Place to Work®.**

Requirements

- Research, gather, and scope product requirements
- Survey and interview different stakeholders
- Define and translate product needs into high-level features, epics, acceptance criteria
- Document and communicate all essential aspects of the project like objectives, scope, requirements etc. with the stakeholders involved
- Work with design team to validate design ideas prior to development
- Work with technical team to determine best implementation methods and delivery schedule
- Produce clear documentations and being able to develop presentation to engage with the development team to help them understand the business needs, problems, and desired outcome
- Participate in the development process cycle, from idea to release
- Deep curiosity, strong product intuition and user empathy
- Have great communication skills, including the ability to persuade and inspire
- Ability to manage multiple products
- Ability to easily manage sprints/ Sprints velocity and schedules
- Ability to work independently and as part of a team
- Scrum Master certification is a big asset
