## Job Description

---

At Krux, Innovation Happens Together, by being a true partner to our customers, by valuing collaboration and teamwork, and by including a diversity of industry and life experience.

As a QA Analyst at Krux you will make an impact by verifying all components of our product to ensure our customers have a great experience. You will work with a team that is self-motivated to solve problems, excited to learn and be challenged, and likes to have fun.

### Who are we?

Krux builds innovative SAAS solutions for the mining industry. We empower our customers to make better decisions through real-time data management and analytics. Understanding our customer's needs and the ability to solve their problems is what sets us apart. Krux, founded in 2016 and headquartered in Alberta, has global reach. We support client's operations on every continent (well, except Antarctica).

### What you will do

- Work with business and engineering teams to define, design, develop, test, and deploy solutions.
- Build, automate, execute and optimize test cases based on business and functional requirements.
- Diagnose and troubleshoot problems with databases, web and mobile applications.
- Clearly document issues and ensure they can be reproduced.
- Work with the team to proactively find new ways improve quality.

### Who you are

- You are passionate about making software the best it can be.
- You have attention to detail but can also look at the big picture of how the whole system is working.
- You love being challenged to solve a new problem.
- You are a self-starter who thrives in a fast-paced environment.
- You are a team player that is always ready to help out a co-worker.
- You are eager to automate the repeatable test cases and not afraid to learn a new tech.

### What you bring

- 5+ years' experience working as a software QA Analyst or similar role.
- 2+ years' experience in test automation for continuous delivery in agile environment.
- Post-secondary training in computer science, quality assurance, or related field.
- Familiarity with Jira, Android, iOS, SQL, and PowerBI would be an asset.
- Knowledge of playwright would be an added advantage.
- Knowledge of drilling and/or mining industry would be an asset.
- Most importantly, critical thinking, problem solving, willingness to learn and ability to be flexible.

### When you Work at Krux

- You will be valued and respected. We believe every team member brings valuable ideas and experiences no matter their seniority. We support and empower the team, and trust you to get the job done.
- You will be part of a team where we lend each other a hand. We strive for high performance by fostering an environment that emphasizes communication, collaboration, and mentorship. We believe that the only way to succeed is together.
- You will help our customers. Not every role is customer facing but at the end of the day we are all working to make our customer's lives easier. Our goal is to create innovative solutions with a strong emphasis on user experience.
- You will have a life outside of work. We have partners, kids, families, and friends too, so we realize that work is just one part of your life. Krux offers work life balance with flexible hours and a hybrid schedule. We value the power of our differences and at Krux, we walk our talk. We have a diverse team including in leadership positions and are dedicated to creating a diverse, equitable and inclusive environment. We ensure equal opportunity for all applicants and encourage people of all visible minorities, including Indigenous applicants, and those of any religion, sex, age, ability, sexual orientation, gender identity or expression to apply.

### Now What?

If this position sounds like a great fit, we want to hear from you!

**· Please submit your resume and cover letter with one special request - Please answer this question in your cover letter: What is one example of a test automation project you are most proud of?**
