Job Description

Cority is the global enterprise EHS software provider creating industry-leading technology to empower those who transform the way the world works.

For over 35 years, Cority has been powered by the spirit of innovation, deep domain expertise, and a commitment to integrity that enables higher levels of operational and sustainable performance with the most comprehensive, human-centered, and secure SaaS platform to help workers and businesses thrive in 100 countries around the world.

The company enjoys the industry's highest levels of client satisfaction and has received many awards for its strong employee culture and outstanding business performance. To learn more, visit www.cority.com.

POSITION SUMMARY:

Reporting to the Team Lead, Quality Assurance, this role is responsible for supporting quality of Cority's main project in the fast-paced Agile environment.

RESPONSIBILITIES:

• Learn the products and be the vocal advocate for its quality
• Analyze business requirements documentation and provide meaningful estimates of QA effort
• Design and review functional and regression test scenarios
• Identify and document testcases that can be covered by automation
• Identify risks early on and efficiently communicate them to the team leads, developers, and QA Manager
• Identify and report bugs, with clear, efficient steps to reproduce
• Track the progress of defects and work closely with developers to ensure they are fixed in a timely manner
• Oversee the release of the functionality through the different environments
• Ensure quality standards are being met throughout the development cycle

QUALIFICATIONS:

• Must have a university degree in either computer science, engineering, or the equivalent work experience
• At least 5 years working experience as a software tester
• Extensive experience in an Agile/Scrum environment
• Deep understating of QA role in Agile
• Strong grasp of testing methodologies, technics, and of testing (functional, regression, performance, etc.)
• Outstanding analytical and problem-solving skills
• Proven record of collaborating with product on requirements
• Proven ability to develop, review, and execute test cases, create bug reports and analyze test results
• Proven record of providing meaningful estimates
• Ability to work independently or as a team member
• Strong communication and interpersonal skills
• Familiarity with bug tracking/test management tools-Jira, Zephyr and/or Testrail
• Fluent English
• Previous experience with complex projects is an asset
• Previous experience with REST API & SQL is an asset

Cority is committed to a diverse and inclusive work environment.
