Job Description

About Clutch:

We're on a mission to reinvent the way people buy, sell, and own cars. Are you game?

Clutch is Canada's largest online used car retailer, delivering a seamless, hassle-free car-buying experience to drivers everywhere. Customers can browse hundreds of cars from the comfort of their home, get the right one delivered to their door, and enjoy peace of mind with our 10-Day Money-Back Guarantee... and that's just the beginning.

Named two years in a row to the Globe & Mail's list of the Top Growing Companies in Canada and also awarded a spot on LinkedIn's Top Canadian Startups list, we're looking to add curious, hard-working, and driven individuals to our growing team.

Headquartered in Toronto, Clutch was founded in 2017 and currently services British Columbia, Alberta, Saskatchewan, Ontario, New Brunswick, Nova Scotia, and Prince Edward Island. Clutch is backed by a number of world-class investors, including Canaan, BrandProject, Real Ventures, D1 Capital, and Upper90. To learn more, visit clutch.ca.

About the role:

Clutch is looking for an experienced data-driven leader to join our **Strategy & Business Operations Team**. You will work as the data domain expert across the organization, providing strategic insights, resources, and expertise. You will partner closely with teams across product, engineering, pricing, and operations to streamline processes, enhance efficiency, and guide data-driven decision-making. Your work will directly impact Clutch's growth and operational effectiveness, making you a key contributor to the company's success.

What you'll do:

- You'll be a ruthless truth seeker - helping to build strategies, test hypotheses, and drive data-driven decisions across the business
- Develop metrics and dashboards to focus the team on critical KPIs
- Improve analytics infrastructure, quality, and efficiency
- This is a full-time **on-site** position based at our **downtown HQ at 60 Adelaide Street East** - remote candidates will not be considered

What we're looking for:

- 5+ years of experience in data analytics/BI, preferably in high-growth organizations
- Expert in SQL and data visualization tools such as Metabase and Tableau
- Strong written and verbal communication skills to influence non-technical audiences with analytical insights
- Comfort working on ambiguous problems with large and complex datasets
- Self-starter and ability to dig deep into a problem area
- Experience productively collaborating with a broad range of functions (data engineering, product management, finance, executive leadership etc.)

It'd be great if you have:

- Experience building & scaling data functions from the ground up
- Experience building data pipelines

Why you'll love it at Clutch:

- Be part of a disruptive, tech-driven company that is transforming the automotive industry, one of the largest and fastest-growing B2C startups in Canada.
- A unique opportunity to join a well-funded business with product market fit, but lots of space to drive an impact and learn.
- Freedom to innovate and ownership of your role - work on meaningful and challenging projects that have a direct impact on the business.
- Opportunities for growth and development in a rapidly scaling company.
- Competitive compensation and equity incentives!
- Health & dental benefits

Clutch is committed to fostering an inclusive workplace where all individuals have an opportunity to succeed. If you require accommodation at any stage of the interview process, please email talent@clutch.ca.
