## Job Description

### Who We Are
Cymax Group Technologies is a leading eCommerce technology and logistics services platform for furniture vendors and retailers. We maximize the best of technology, automation, and AI to simplify the complexities of eCommerce through our two products - Channel Gate and Freight Club. We partner with furniture vendors and retailers to tackle some of the industry's biggest challenges, offering prescriptive recommendations to optimize their ROI in a competitive market. Our remote-flexible team works to support our partners from the US and Canada. We are proud members of Team True North, a ranking that spotlights high-performing tech firms tracking to $1 billion in annual revenue with growth rates that match the top one per cent of companies in the world. For more information, please visit our website: https://www.cymaxgroup.com/

### The Role
We are looking for a software developer to design and build internal software services that power our large-scale commerce systems that provide our customers with access to over 600,000 products across multiple storefronts. You will develop and use technical knowledge in .NET and Azure development to create interfaces and tools that are user-friendly and add value to the way we work. You will work closely with the Product Management and the Engineering teams on what you build and will also partner with users across the organization to ensure built solutions meets a broad range of needs.

### Who you are
• 3-5 years of professional software development experience, including SQL development.
• Ability to create and consume REST web service APIs.
• Strong knowledge of C# and .NET libraries and frameworks. Experience with .NET Framework and .NET 8.
• Working knowledge in VB for legacy application migration to .NET 8.
• Experience optimizing queries for large datasets.
• Experience with Azure services such as Azure Functions, Azure App Services, Blob Storage, and Azure DevOps.
• Knowledge of APM tools such as Azure App Insights or Datadog.
• Experience in an Agile/SCRUM development environment.
• Proficiency with Git or similar version control systems.
• Degree or diploma in Computer Science, Information Technology, or related field.

 **Preferred:**
• Front-end experience with React and/or Angular.
• Familiarity with AI-assisted development tools like GitHub Copilot.

 **Bonus Points:** Familiar with Test-Driven Development and integrating with various third-party marketplaces, such as Amazon Marketplace. Familiarity with SaaS based eCommerce solutions.

### What You'll Do
• Use your smart, strategic decision-making abilities to think problems through and make strategic software choices with the best outcome.
• Create architecture designs, do code review, and implement new product features.
• Diagnose and troubleshoot problems with the product.
• Build scalable, fault tolerant solutions that can handle millions of transactions per day.
• Refactor code at to ensure it is clean and consistent.

### What we offer
• Remote-First Culture: Embrace flexibility and work-life balance
• Growth Opportunities: Advance your career within a dynamic environment
• Learning and Development: Access resources for continuous skill enhancement
• Diversity and Inclusion: We value and celebrate differences, fostering an environment where everyone belongs

### Culture at Cymax Group
At our company, we thrive on innovation and entrepreneurship. Our fast-paced environment encourages agility and nimbleness, empowering our team to adapt quickly to changing market dynamics. We're passionate about learning and growth, providing opportunities for professional development. Our decisions are driven by data, ensuring that we make informed choices that lead to success. If you're excited about making an impact and being part of a dynamic team, you'll feel right at home here.

### Compensation
We are committed to transparency in our hiring process. The Salary Range for this role is between $70,000 and $110,000 depending on experience, skills, training and organizational needs. Our salary ranges are determined by role, level and location. We offer a comprehensive range of benefits which includes:
• Health and wellness support for our team members and their families including an employee assistance program
• 100% paid health and dental benefits in Canada
• Paid time off
• Easy access to online and phone-based counselling service
• Remote-flexible work environment.
• Accessibility
We can provide accessibility accommodations during the recruitment process. Should you require any accommodation, please let us know and we will work with you to meet your needs.
