Job Description

Who is Bold Commerce?

[Bold Commerce](#) makes checkout better, helping brands convert more shoppers in more places. As a leader in the composable commerce space, Bold Checkout is the only high-converting, customizable headless solution with built in subscriptions and pricing capabilities, for a checkout without limits. Named one of Built In Austin's Best Places to Work, Canada's Top Employers for Young People, and Manitoba's Top Employers, we're a dynamic team that truly cares about building the future of ecommerce. We live by the [BUILDERS Code](#), a shared set of practices, beliefs, and values that help shape this remote-first company.

Founded in 2012, with team members (Builders) located throughout Canada and the U.S., and backed by investors like OMERS Ventures, WhiteCap Venture Partners, and Round13 Capital, Bold is leading the way to a better, composable ecommerce future.

About the role

Our Engineering Team is looking to hire a Software Developer who thrives when owning their work from concept to production. We're looking for smart people who are passionate about producing high quality software, who run towards a challenge, and are eager to learn and teach others. If you're looking for an opportunity to grow your technical skills and your career, Bold is the place for you!

We use technologies and frameworks including (but not limited to) PHP, Go, Javascript, React, and Laravel. Experience in HTML and CSS will contribute to success in this role.

What you'll do

- Work collaboratively with our Product and Design Teams to build solutions that solve problems and deliver value to our brands
- Learn and assist with designing, building, and maintaining systems and APIs that scale for high traffic
- Identify and debug basic/common issues in the software code
- Own assigned work tasks relating to unit tests, merge requests (MRs), and production releases
- Participate in all System Development Life Cycle (SDLC) activities practiced by the team (stand-ups, reviews, retros, estimating)
- Participate in user story/requirements discussions
- Communicate status updates on work tasks in relation to delivery/launch dates
- Collaborate with other team members to help with resolving incidents and bugs
- Contribute to keeping team-owned product documentation relevant and accurate

What we're looking for

- Equivalent work experience which can be complemented with post-secondary education in computer science or equivalent program
- Minimum 2+ years of experience working as a software developer with a solid understanding of software delivery processes
- Experience writing production-ready code with testability, maintainability, security, and scalability in mind
- Desire to work in a collaborative team environment with multiple different disciplines
- Experience in PHP, Go, Javascript, React, and Laravel considered an asset
- Ideally has some experience working with an ecommerce platform such as Shopify
- Experience working with a fast-paced, Agile-driven development team
