Job Description

Say hello to Newton! The innovative platform that redefines cryptocurrency trading for Canadians. We are on a mission to make financial freedom an accessible reality to every Canadian. We want to empower our customers with the tools and knowledge they need to successfully navigate the world of Crypto. Picture yourself collaborating with a team spread across Canada, yet seamlessly operating in a fully remote capacity. At Newton, distance is not a barrier: it's an opportunity for collaboration and innovation to thrive. Are you ready to be a part of something bigger? Join a team of driven individuals dedicated to pushing the limits of what's possible.

Some of our values:

⬚ Customer first mindset - Commitment to integrity and transparency to our users!

⬚ A dynamic team fueled by collaboration uniting our strengths to overcome any obstacles. Together we build success. We persevere, adapt, and come back stronger, turning obstacles into opportunities.

⬚ We strive for continuous improvement and embrace creativity and encourage experimentation. We push the boundaries of what's possible and continuously explore new ideas, technologies, and solutions.

Role Overview:

We are searching for a software engineer, an essential role focused on designing, developing, and maintaining software solutions. You'll be collaborating with cross-functional teams and improving our products to meet the needs of our customers.

Responsibilities will include:

• Design systems with security and trust as fundamental building blocks

• Evaluate and implement new coding standards and libraries in a fast-paced and engaging environment

• Write high quality, well tested code to meet the needs of an enthusiastic and time-sensitive userbase

• Suggest best practices and optimizations through code reviews and peer programming

• Articulate a long-term vision for maintaining and scaling our backend systems and the teams running them

• Work with engineers, designers, product managers and senior leadership to turn our technical vision into a tangible roadmap every quarter

• Bring positive energy to your day-to-day, and make your coworkers feel included in your interactions

Who you are:

• You thrive in a fast-paced organization, preferably a software startup

• You are self-motivated and self-managing, with excellent organizational skills

• Experience working on a consumer-facing product

• Familiarity with and a passion for cryptocurrencies, web3, or finance

• Experience working with a diverse, geographically-distributed team

• Demonstrated capacity to clearly and concisely communicate about complex technical, architectural, and/or organizational problems

• Post-secondary education in software engineering, computer science, economics, mathematics, statistics, or any related discipline

At Newton, we celebrate our inclusive work environment and welcome members of all backgrounds and perspectives to apply. We are committed to providing reasonable accommodations and will work with you to meet your needs. If you are a person with a disability and require assistance during the application process, please don't hesitate to reach out!
