Job Description

At Interac, we design and deliver products and solutions that give Canadians control over their money so they can get more out of life. But that's not all. Whether we're leading real-time money movement, driving innovative commerce solutions like open payments for transit systems, or making advancements in new areas like verification and open banking, we are playing a key role in shaping the future of the digital economy in Canada.

Want to make a lasting impact amongst a community of creative thinkers, problem solvers, technical gurus and high-performance application developers? We want to hear from you.
Reporting to the Senior Principal, Enterprise Architect, the Technical Analyst Intern will work cross functionally with the Enterprise Architecture & Practice and Governance teams to build experiences, deliver real solutions and support with improving Interac's architecture practice.

You'll be responsible for:
• Developing proof-of-concept solutions for the architecture practice, including automation and Confluence add-ons
• Conducting analysis of the existing architecture practice processes
• Building out reports for the Enterprise Architecture and Governance Team
• Preforming interviews with key individuals to understand opportunities to improve the architecture practice
• Working with the agile team to support the delivery of enhancements to Interac's technology & platforms
• Supporting various solution initiatives with a dedicated agile team

You bring:
• Comfortable with learning and working effectively either independently or with groups across different functions and levels
• Confidence in your ability to communicate verbally and written in a detailed and impactful way – you have some experience with technical writing
• You are a proactive problem-solver with a demonstrated track record of driving continuous improvement initiative
• An aspiration to work in software development after graduation
• The natural ability to pick up new technology – you enjoy learning about new tools and how they work
• Understanding that success is in the details – you tend to notice things that others don't
• You can code confidently and enjoy tackling challenging problems – you often utilize your creative thinking skills
• Although not required, you have some familiarity or previous experience with the following:
• A programming language like Java or Python
• Front end tooling (e.g. HTML, CSS, JavaScript)
• A single page application framework like Angular JS
• Working with databases (e.g. Oracle, Azure RDBMS, MongoDB)
• Software design patterns
• Understanding of Atlassian, Confluence & Jira
• Previous working or co-op experience working as a software developer, engineer or technical coordinator in a relevant field is an asset
• Currently enrolled in a Canadian university or college program in a relevant discipline, like computer science or information technology/systems, software/computer engineering or similar related field
Workstyle: Hybrid*
Location: Toronto
Term: Sept - December 2024
Duration: Monday - Friday
*Must be eligible to work for Interac Corp. in Canada in a Full Time Capacity

PLEASE NOTE: To be eligible for Interac internship roles, you must be currently enrolled in a Canadian post secondary academic institution
Interac requires employees to complete a background check that is completed by one of our service providers. We use this service to complete the following checks:
• *5-year employment verification;*
• *Canadian criminal record check;*
• *Education verification;*
• *Canadian ID cross-check;*
• *Public safety verification; and*
• *Credit inquiry*
